

Family Member Well-being Index (FMWB)

The Family Member Well-being (FMWB) Index was developed, by Hamilton McCubbin and Joan Patterson (1982e), to measure the degree to which a family member is adjusted in terms of concern about health, tension, energy, cheerfulness, fear, anger, sadness and general concern.

Example Items:

- *How concerned or worried about your health have you been?
- *How angry have you been?
- *How sad have you been?

Available in: English, Thai
