**Family Member Well-being Index (FMWB)**

The Family Member Well-being (FMWB) Index was developed, by Hamilton McCubbin and Joan Patterson (1982e), to measure the degree to which a family member is adjusted in terms of concern about health, tension, energy, cheerfulness, fear, anger, sadness and general concern.

**Example Items:**
*How concerned or worried about your health have you been?*
*How angry have you been?*
*How sad have you been?*

**Available in:** English, Thai
